PROJECTS

Voice Based Transport Enquiry Sytem
DB Manager *Nov 2022 - Nov 2022*
It was a group project and was made using python.The frontend and backend was made using the Tkinter (GUI) interface and for the database I have used Sqlite for storing the information of trains as we have focused on trains only due to time and space contraints.For speech part we have used python voice module.

Bluetooth Car using Arduino
It was an individual project for which I used Arduino Uno as the primary Ic,bluetooth Hc-05 for bluetooth connectivity,and Bo motors for movement.
